Thin Solid Films, *186* (1990) 370–372

Contents of Vol. 186

IUPAC Report

Reporting experimental pressure–area data with film balances (recommendations 1984) 1
L. Ter-Minassian-Saraga (Paris, France)

Electronics and Optics

Optimizing optical properties of reactively sputtered titanium nitride films 15
A. Skerlavaj, Y. Claesson and C.-G. Ribbing (Uppsala, Sweden)

Electrical resistivity and interference functions of amorphous Ni_xAg_{1-x} thin films 27
A. Zeghib, C. Vautier, J. le Bas and F. Druaux (Mont Saint Aignan, France)

An electron microscopy study of the crystallization of amorphous $Se_{100-x}Bi_x$ ($x \leqslant 15$) thin films . 37
A. Muñoz, F. L. Cumbrera and R. Márquez (Seville, Spain)

Optical absorption of tungsten bronze thin films for electrochromic applications 47
F. G. K. Baucke (Mainz, F.R.G.), J. A. Duffy and R. I. Smith (Aberdeen, U.K.)

Metallurgical and Protective Layers

Effect of Coulomb friction and viscous forces on interfacial waves at steel–steel boundaries under external pressure. 53
V. Kumar and G. S. Murty (Bombay, India)

Preparation and Characterization

Preparation and electrochemical behaviour of Sb_2O_5 films 59
W. A. Badawy (Giza, Egypt)

The effects of rapid thermal annealing on the properties of plasma-enhanced chemically vapor-deposited silicon nitride 73
W. D. Brown (Fayetteville, AR, U.S.A.) and M. A. Khaliq (Mankato, MN, U.S.A.)

Interfacial reactions in Ag–Zn thin film couples 87
A. K. Bandyopadhyay, S. K. Sen and S. Sen (Calcutta, India)

The influence of indium seeds on the deposition of Zn_3P_2 thin films by co-evaporation. 99
A. Lousa, M. V. Garcia-Cuenca, C. Ferrater and J. L. Morenza (Barcelona, Spain)

Structure and morphology of thin SnO_2 films 107
L. I. Popova, M. G. Michailov, V. K. Gueorguiev and A. Shopov (Sofia, Bulgaria)

Electrodeposition and heat treatment of $CuInSe_2$ films 113
N. Khare, G. Razzini and L. P. Bicelli (Milan, Italy)

Dynamic control of reactive magnetron sputtering: a theoretical analysis. 129
A. G. Spencer and R. P. Howson (Loughborough, U.K.)

Ultrathin deposition of copper on room temperature $SrTiO_3(100)$. 137
J. E. T. Andersen and P. J. Møller (Copenhagen, Denmark)

Langmuir–Blodgett and Related Films

On the presence of holes in stearic acid Langmuir–Blodgett films studied by dark field electron microscopy. 147
S. Y. Luk, A. C. Wright and J. O. Williams (Manchester, U.K.)

Photochromic and non-linear optical properties of $C_{16}H_{33}$-P3CNQ and $C_{16}H_{33}$-Q3CNQ Langmuir–Blodgett films 155
G. J. Ashwell (Bedford, U.K.)

Thin Solid Films, *186* (1990) 370–372

S. Y. Luk, A. C. Wright and J. O. Williams (Manchester, U.K.)

Photochromic and non-linear optical properties of $C_{16}H_{33}$-P3CNQ and $C_{16}H_{33}$-Q3CNQ Langmuir–Blodgett films 155
G. J. Ashwell (Bedford, U.K.)

Interactions of nitrogen dioxide with Langmuir–Blodgett films of a copper porphyrin 167
J. P. Li, R. H. Tredgold, R. Jones and P. Hodge (Lancaster, U.K.)

Thin oriented films of molybdenum disulphide 177
W. M. R. Divigalpitiya, S. R. Morrison and R. F. Frindt (Burnaby, British Columbia, Canada)

Letters

Nd_2O_3 thin films deposited by a new chemical vapour deposition technique L1
M. Langlet (St. Martin d'Hères, France) and R. D. Shannon (Wilmington, DE, U.S.A.)

Dislocations in diamond film L7
N. Zhang, C. Meng, Y. Wang and Z. Jin (Changchun, China)

Enhanced IR reflectance of cadmium stannate films prepared by DIP coating L11
C. M. Cardile (Kwinana, Western Australia, Australia), M. E. Bowden (Petone, New Zealand), A. J. Koplick (Melbourne, Australia) and R. G. Buckley (Lower Hutt, New Zealand)

The saturation magnetostriction of a multilayer structure of FeBSi glass films with different non-magnetic sublayers L15
J. Wenda and A. Kułak (Cracow, Poland)

Preparation of TiC films by photochemical vapour deposition using a D_2 lamp L17
S. Motojima and H. Mizatani (Gifu, Japan)

Monolayers of phenylenevinylene amphiphiles at the air–water interface L21
A. Watakabe and T. Kunitake (Kurume, Japan)

D.c. dielectric breakdown in phosphosilicate glass films prepared by low temperature chemical vapour deposition L25
D. Serghi and C. Pavelescu (Bucharest, Romania)

Electronics and Optics

Angular dependence of the main resonance field in the spin wave spectra of single-crystal nickel films 193
A. A. Hussain (Benghazi, Libya)

Metallurgical and Protective Layers

Effects of compositional variations in an electrolyte containing water, ethanol, and ammonium tartrate on barrier anodic Al_2O_3 film formation 201
J. K. G. Panitz, D. J. Sharp, F. E. Martinez, R. M. Merrill and K. J. Ward (Albuquerque, NM, U.S.A.)

Wear resistance of ion-implanted, chemically vapor-deposited nickel die inserts 215
A. W. Mullendore, L. E. Pope, A. K. Hays, G. C. Nelson, C. R. Hills, (Albuquerque, NM, U.S.A.) and B. G. LeFevre (Atlanta, GA, U.S.A.)

Internal stress of vapour-deposited aluminium films: effect of O_2 and water vapour present during film deposition 233
R. Abermann (Innsbruck, Austria)

R.f. plasma nitriding of Ti–6Al–4V alloy 241
A. Raveh, R. Avni and A. Grill (Beer Sheva, Israel)

Langmuir–Blodgett and Related Films

Effect of gravity on copper phthalocyanine thin films I: enhanced smoothness and local homogeneity of copper phthalocyanine thin films grown in a microgravity environment 257
M. K. Debe, R. J. Poirier, D. D. Erickson, T. N. Tommet, D. R. Field and K. M. White (St. Paul, MN, U.S.A.)

Effect of gravity on copper phthalocyanine thin films II: spectroscopic evidence for a new oriented thin film polymorph of copper phthalocyanine grown in a microgravity environment 289
M. K. Debe and K. K. Kam (St. Paul, MN, U.S.A.)

Effect of gravity on copper phthalocyanine thin films III: microstructure comparisons of copper phthalocyanine thin films grown in microgravity and unit gravity 327
M. K. Debe and R. J. Poirier (St. Paul, MN, U.S.A.)

Condensed Matter Film Behaviour

Reactively sputtered indium tin oxide polycrystalline thin films as NO and NO_2 gas sensors 349
G. Sberveglieri, P. Benussi, G. Coccoli, S. Groppelli and P. Nelli (Brescia, Italy)

Thermal diffusivity of amorphous semiconductor superlattice films 361
Z. C. Zhang, J. P. Roger, D. Fournier, A. C. Boccara and J. C. Wang (Paris, France)

Letters

Effect of excess carbon on the hardness of Si–C and Ti–C coatings formed by plasma-assisted chemical vapor deposition L29
K. Oguri and T. Arai (Aichi-ken, Japan)

Structural study of TiB_2 film by grazing incidence X-ray diffraction L33
E. Matsubara, Y. Waseda (Sendai, Japan), S. Takeda (Fukuoka, Japan) and Y. Taga (Aichi, Japan)

Chemical vapour deposition of SiC layers from a gas mixture of $CH_3SiCl_3+H_2+Ar$. L39
S. Motojima and M. Hasegawa (Gifu, Japan)

Fluorinated hydrogenated silicon films L47
D. H. Zhang and D. Haneman (Kensington, New South Wales, Australia)

Free-standing polymeric Langmuir–Blodgett films deposited across 0.2 μm pores. L51
R. Jones, R. H. Tredgold, F. Davis and P. Hodge (Lancaster, U.K.)

Measurement of work function using an electron gun in the retarding field regime L55
A. Ben-Shalom, A. Seidman and N. Croitoru (Tel-Aviv, Israel)
